<b>Cold</b>							

No Impacts

Minimal Impacts

Moderate Impacts

Severe Impacts

# **WEATHER KEY POINTS**

**03/24/22 - 03/30/22**

## **Thursday - Wednesday**

- Very warm temperatures will persist statewide through Sunday, with daytime high temperatures well into the 80s across many inland lower elevations, while the southeast deserts warm into the 90s
  - These temperatures will remain near or above record territory for late March, with some heat impacts likely during the day. Nighttime temperatures will continue to be cool, reducing the risk for more significant heat impacts
- An approaching storm system appears increasingly likely to bring more widespread rain and mountain snow as well as cooler temperatures later Sunday through Tuesday
  - At this time, the heavier precipitation is expected across the central/southern Sierras and southern California

# PRECIPITATION FORECAST

03/25/22 - 03/26/22

**No precipitation is expected through Friday**

**Note:** Forecast precipitation amounts are an average for any particular location. Thunderstorms may produce locally higher rainfall amounts.

**Precipitation (inches)**

# **WEATHER OUTLOOK**

**03/29/22 - 04/06/22**

## **6-10 Day Outlook (March 29 - April 2)**

### **Temperatures**

- Near normal temperatures are favored for much of the state, except for interior northern California where above normal temperatures are favored

### **Precipitation**

- Below normal precipitation is favored for much of the state, except near normal precipitation for far southern California

## **8-14 Day Outlook (March 31 – April 6)**

### **Temperatures**

- Below normal temperatures are favored statewide

### **Precipitation**

- Below normal precipitation is favored statewide
